

# New Tech Network PBL Showcase Series

Quality project-based learning is more than classroom practice, it is about how an entire school community organizes to engage students in learning that produces critical thinkers, problem-solvers, and collaborators. See how New Tech Network schools are organizing culture, teaching practices, and assessment practices in service of graduate profiles that meet the needs of our rapidly evolving society.

## Attending a NTN PBL Showcase will:

- ✓ Inspire your school and/or district team to explore what is possible when students are engaged in authentic learning
- ✓ Engage your team in learning about PBL and learner centered practices through observation and discussion
- ✓ Connect your team with fellow educators who are new to their PBL journey and with those who are seasoned practitioners
