

ACCELERATOR: **LEARNER-CENTERED ASSESSMENT PRACTICES**

Make assessment a journey, not just a grade.

Learning includes getting a little lost and making mistakes. Assessments that measure growth, not just completion, motivate students to proudly own their adventure.

Learner-Centered Assessment Practices equips educators with the knowledge required to design confidence-building assessments by celebrating progress, not perfection. You'll learn practical strategies to integrate growth-oriented feedback, encourage collaborative reflection, and nurture compassionately constructive communication.

What You'll Get

Practical, Active Learning:

Learning together through *experiencing* Learner-Centered Assessment Practices.

Tools for the Team:

Gain access to effective tools and resources that will improve their classroom assessment practices.

Proven Strategies:

Effective approaches that have fostered deep learning and reflection in classrooms.

What You'll Do

Assess What Matters:

Develop purposeful assessments that are seamlessly integrated into instructional design, and allow prompt feedback for students.

Grow Skills and Knowledge:

Focus on fostering student growth in content knowledge and developing essential skills like collaboration and communication.

Collaborative Learning:

Share and calibrate on Learner-Centered Assessment Practices to develop college and career outcomes for students.

Practice. Design. Reflect.:

Practice student-centered assessment, design a lesson, and provide feedback to peers.

Impact

EMPOWERED EDUCATORS

New Tech Network has worked with over 20,000 educators to implement learner-centered assessment practices

90%

90% of NTN educators routinely develop strategies for each student based their classroom data

88%

88% of NTN educators routinely analyze information (such as student work and data) together to inform their practice and center educational equity

ENGAGED STUDENTS

93%

93% of NTN students report that their teachers help them solve problems on their own rather than simply giving them the answers

Surveys have shown that NTN students perceive their teachers' instructional methods as superior to those in non-NTN schools, contributing to a positive learning environment

86%

86% of NTN students say their teachers give helpful feedback on their work

How It Works

- Duration: 1 day
- Investment:
Onsite: \$5,800 • Virtual: \$3,000
- Up to 35 participants
- Digital version of the NTN Practices Cards included

//

"When students experience PBL, they are forced to struggle productively. Too often we prepare students for a calculated school experience, asking them to memorize information and regurgitate it on an assessment. Teaching students to persevere and ask questions prepares them for success."
